Our living rooms. How did we get here? Our living room. The first thing that comes to mind when I think of our living room is the pool table. We have the original vintage one that was built in 1946 by a guy named John Dennison. We also have a new game that was custom built by our friend “Denny” – the best friend a kid could ever have. He, like me, is a golden retriever. Like I, Denny has zero loyalty to any other kind of dog. Denny and his owner, Lisa, were a constant source of comedy, laughter and banter to my brother and me growing up. We don’t live in the same city that we grew up in, but we still get together as often as possible. The only time it wasn’t possible was when we were both in Hawaii, but they made it possible somehow. The talk that Denny would get in on a Tuesday morning was priceless, just like the stories my brother and I would get. Recently, Lisa told us that she and her husband are finally moving to another part of the country so she can start over again with her social life. One of the things they did before they moved was to pick up the house that they currently live in. In a move to be more “green,” they wanted to be sure that the new owners were able to renovate and rebuild. They are apparently, doing a great job. I got to take a look around. It was really different from our house. It was like stepping into a completely different world. Everything from the color, the walls, the furniture, and the layout were so foreign to us. There were colors that I wasn’t used to and I found it difficult to adjust to. a1d647c40b
