screen and are represented by pull down menus: The pull down menu for viewing commands is located at the top of the screen, while the "Open" menu is located at the lower left. The "Help" menu and the pull down menu for design commands is located at the lower right of the screen. The upper right side of the screen is used for inserting and editing commands. The "Clipboard" menu is located at the top, the "Modify" menu is located at the left, and the "Rulers" pull-down menu is located at the lower right. The command line is used to execute commands directly. The command line is located at the bottom of the screen. CAD commands are executed by entering a command name followed by a command parameter (often referred to as a parameter, a parameter is usually a number followed by an operator), and then pressing enter. The command name may be typed in using the keyboard, or by clicking on the command name displayed in the upper right of the screen. The command parameter may be typed in using the keyboard, or by clicking on the command name displayed in the upper right of the screen. The design is organized into two main types of layers: Boundary Layers: These are graphic elements that define the boundaries of objects.

---

Parameters: Settings that define the properties of objects. It is common to assign a specific parameter value to each boundary layer of an object. A parameter's value is often based on an existing object's shape, or simply a specific distance that is relevant to the shape of the object. There is one layer called the Current Layer, which is the active layer on which commands are applied. Docking AutoCAD is a popular application and is capable of running on multiple platforms. A man has been charged with homicide following the death of a 22-year-old man at a hospital in Wakefield, Ontario, police say. The medical examiner's office has not yet determined a cause of death, however the office confirmed the man was already dead by the time they arrived. "Police located a man at a residence in the city," Ontario Provincial Police said in a statement. "He was arrested at the residence and has been charged with second-degree murder. He will appear in court later this week." Police also say the case is not being investigated as a "domestic situation."
