Basically, I want to save contact details (name, phone number etc) to an Email address and then when the phone is synced, the contact details will be added to the email with a small message saying they have been added. I'm using a BQ Aquaris M10 in the UK, so the email address is @hotmail.com It seems likely that I need to use contacts, but I can't find the right function for what I want to do. I understand I can use the SharedPreferences but I'm unsure how to use them. Thanks. A: You cannot save contact details to the emulator. Only to a file on the SD card and it has to be in MSC mode. You are out of luck. Amajita moved to SoCal from Jilin. She
