Guitararium! is a Guitar Tutor

especially designed to help you learn to play the guitar and play music. The program comes with an innovative interface and gives you a real musical backing including solos, rhythm and chord progressions. It has a simple interface and a few song examples which can be played along to. It includes information about chords, frets, and strings on your guitar. By playing the songs the user gets a very good musical reference, which aids in learning. There are three levels of complexity: Level 1: Free Level 2: \$17.99 Level 3: \$37.99 After the songs are completed,

additional features are unlocked with each level. This includes the ability to download new songs, and a Tune Editor, different styles for acoustic or electric guitar, and more. The Tune Editor feature is not only great for creating your own songs, but it allows you to study the format that other musicians use to create music, with the help of a comprehensive tutorial. The length of time to complete the program is about an hour and a half, but the program is easy to use, so you can get started right away. GuitarTonic allows you to learn music on an integrated

mobile device. It includes a set of lessons and a set of songs. The lessons focus on the fundamentals and include practical exercises that build upon each other. Each lesson includes an introductory lesson, practice exercises, note-by-note instruction and a full score. The songs are also fun and easy to learn. Whether you're a beginner or an advanced guitarist, GuitarTonic will help you learn in a fun and informative way. It includes an integrated music book with chord charts, a full-screen guitar display and a signature mode. GuitarTonic

enables you to learn guitar in a fun, hands-on way. It includes music lessons, interactive guitar games, and guitar practice modules. Through a series of structured lessons, it begins with an introductory lesson

- Learn over 3000 chord voicings. -
Over 500 scales. - 550 arpeggios. -
110-150 triads in all positions in
different inversions. - Notes on the
fretboard. - Learn notes on the left-
hand fingerboard. - Learn chords
that have been played using all 12
major and minor chords and their
inversions. - Learn and use chords
with lots of variant name but the
same sound. - Learn chords when
playing in a different key than the
key of the song (transposing). -
Learn when to use chord inversions

on a specific chord. - Learn arpeggios by pointing and clicking notes on the keyboard. - Learn and practice over 200 play-along backing tracks. - Learn new scales. - Learn new chords and chords combinations (chords built from chord scale). - Learn to alternate chords. - Learn chord shapes. - Learn chord shapes and chord positions. - Learn chord shapes (ascending-descending shapes). - Learn chord shapes (lateral shapes). - Learn chord shapes (fermata, 8th, etc.). - Learn chord shapes (barre). - Learn chord shapes and chord positions (fingerboard). -

Learn to use the fretboard of a left handed guitar. - Learn to use the fretboard of a right handed guitar. - Learn triads when played using multiple notes on the same string. - Learn triads when played using same notes on different strings. - Learn triads when played using different notes on the same string. - Learn triads when played using different notes on different strings. - Learn triads when played using triads on different strings. - Learn triads when played using alternating 3rds on different strings. - Learn triads when played using 3rd intervals on

Countless chord progressions and scale patterns ensure that your practice time is well focused and you are learning the right stuff. All too often the key to a good sound comes from down and up which we have been taught to play at the same time. Starting out on an instrument is a great challenge and not so easy if you only practice the notes down and up simultaneously. Guitar Power offers both major and minor scales and arpeggios in different inversions and if you are playing the guitar in your

standard position it will make the learning process easier. The Internet is filled with all sort of software applications that help you learn various new things, including to play a new instruments. Guitar Power does just that, it teaches you over 3000 chord voicings, 500 scales, 550 arpeggios, triads in any inversion, notes on the fretboard and many more. It sports a really intuitive layout with lots of features at hand. Intuitive graphical interface with many tools The application doesn't take long to install and it doesn't come with a complicated setup that

you would need to complete before you can actually use its features. You simply need to take your guitar, launch the application and start learning. It sports a really intuitive graphical interface, so you shouldn't have any trouble with learning how to play your guitar. Because of its ease-of-use and complexity, it's suitable for all levels of guitar players, from beginner to professional. Learn to use scales, chords and arpeggios The application displays formulas and notes contained within selected chord, scale etc. Scales and arpeggios can

be displayed over the whole fretboard or restricted to one position. It includes practice chord progressions are included to facilitate learning and using chords and scales and it has over 200 play-along backing tracks. Both right-handed and left-handed display is supported, it has a print function, metronome function and playback through soundcard or external MIDI device. More features and tools The fretboard display represents a guitar fretboard as you would see it as you look down on your guitar held in the standard playing position. The

diagram above shows a left handed guitar with the nut at the left-hand side and with the lowest (thickest) string at the bottom. Chord finder allows you to point and click notes on the keyboard to make your own chords. Guitar Power then uses its extensive knowledge base to suggest a name for that
