This theme is specially designed for a desktop with many different windows, from files to running processes, and is a solid green background. The Windows control panel is almost white and the start menu is colored purple, all with a soft, blue color. The computer name is in black and the folder icon is colored blue and green. Try and see! 1. Unpack all the contents of the downloaded file to your desktop. 2. Double-click "Windows7 Innerlight\_Theme.bat". You can also double-click on the "Windows7 Innerlight\_Theme.exe" to run it. 3. Enjoy. 4. If you like the theme, do not forget to post a review. 5. Have fun! Very nice looking theme and color scheme. Looks good with the Windows 7 Blue theme. PS: It's too bad you do not have a "Theme Builder" tutorial to create your own themes. I wrote a tutorial for people to create their own themes on the site. On the download page of Innerlight, there is a link at the top of the page titled "How to Create A Theme". I wrote a tutorial for people to create their own themes, but the feature is somewhat limited and it does not come with all of the features found in commercial themes such as themes for Aero Theme, etc. If you have any questions about the tutorial, feel free to contact me or leave a comment on the thread for the tutorial. Hi! I noticed that you use a slideshow to show your pics. I made a tutorial for you and your readers to download a slideshow for Windows. It allows you to change all the slides, and even make the slideshow random. You can download it from my site. This way, you don't have to re-download the slideshow everytime you want to change a slide. My name is Kwentusu. I am a Web Designer. I can do anything related to Graphic Design. I specialize in.PSD files for web design. I can design a website or a logo from scratch. But I can also help you edit or tweak your PSD files if you have Photoshop CS5. I also have a basic knowledge of HTML/XHTML coding. So, I can help you with that too. What I can do for you: 1. Web design (design a website, PSD to HTML, PSD to XHTML, PSD to W3C

KEYMACRO Windows/Mac version: PostIt Activation Code is a lightweight Yahoo! widget developed specifically for helping you place sticky notes on your desktop in order to remember important events. You are offered the freedom to keep multiple notes on the screen at the same time. It can be deployed on all Windows versions out there, provided that you have the Yahoo! Widget Engine platform installed on the target PC. Clean and simple design After going through a simple installation process where you only need to follow the instructions in order to complete the process, the widget automatically places three notes on your screen. You are allowed to move them anywhere on the desktop using drag-and-drop actions. Right-clicking on a note gives you the possibility to get access to a set of configuration settings. The dedicated parameters look easy to work with so you are not going to spend a lot of time wondering where to get started. In addition, you can easily create new notes or delete the selected ones. Sticky notes can be resized according to your preferences. What's more, PostIt lets you adjust the background color of each note, set the location where note data is saved, as well as make the gadget use random colors when creating a new note. Tests have pointed out that gadget carries out tasks quickly and without errors. It remains light on system resources so the overall performance of the computer is not hampered. You may keep it running in the background. Other notable configuration settings implemented by the Yahoo! platform help you keep the widget on top of other panels, ignore all mouse events, turn off the ability to drag the widget with the mouse, as well as set the opacity of the gadget by moving the integrated slider. Final ideas All in all, PostIt comes bundled with several basic features for helping you create notes on your desktop. It is suitable especially for less experienced users. PuzzleSites.com is a free online games website where you can play free games in many categories including arcade games, action games, sports games, puzzle games, card games and games for girls. We also have daily, weekly and monthly prizes to give away to our members. You don't need to download any software to enjoy playing free games online. All you need is a web browser and a fast connection to play our games. How to install to your PC, Mac and mobile devices. We recommend you use Google Chrome to install the games on your PC because it is faster and safer than Microsoft Edge and it is also supported by most of 77a5ca646e
