Trainer for Deus Ex: Mankind Divided 1.02.440.4 [639.5MB] Trainer for Deus Ex: Mankind Divided 1.02.440.4 This is a fully working version of the game, however I have some of the.x model in it so it is missing enemy.pk3 and selectable models so it is in a different format to the official trainer. I will attempt to make a trainer for for Hitman 2.0 later on in the year. Alot of work has gone into this. All of the models have been checked for any cydia errors and have been verified. I have cleaned any model errors by correcting the.x models to fix some issues with the.pc files. So you can easily convert this into a pc trainer. Update 2.0.1 I just uploaded an update for this trainer and it will be available to download very soon. I have also uploaded the trainer to the cydia trainer shop.
