Description:

The year is 2120. The solar system is controlled by 10 hidden power alliances. One of them, represented by the Vatican, has become a powerful global empire, and now controls the destiny of all mankind. However, not every action in this empire is as clear as it seems.

After a nuclear accident in Russia, a young girl named Karla finds a way to transfer the soul of her dead brother into the body of a very special, but very dangerous replica. The replica, called a shadow, has its own brain that holds immense power over the corrupted Vatican. It has been compared to the awesomeness of a Jedi Master and many people are trying to get their hands on the shadow to use it for their own glory.

You are cast out of your shadow prison into a fading world as the year is coming to a close. First, you need to find someone to take care of you, and then together you have to survive 24 hours, try to understand the workings of the Divine Council and finally find a way to free the shadow.

Like many others, you can be a good guy all the time or an evil doer, maybe even a mixture of both. You decide what your personal goal is: to survive, to lose the shadow, to get the power. Do you have what it takes to face 666? Do you have any chance to succeed?

One patient, with advanced disease, achieved complete remission, and the other two patients received marrow transplants with hematopoietic recovery. The latter two patients showed a relapse of myeloma after a median of 449 days (range, 265-779) in the first patient and 361 days (19-718) in the second patient. These results suggest that melphalan at a dose of 140-165 mg/m² is an effective treatment for multiple myeloma with autologous marrow transplantation, especially in patients at an earlier stage of the disease.Pages Saturday, June 6, 2011 56 Months in Pictures The other day while I was pouring some milk in my grocery cart, I stopped to look at 56 months of life in these pictures.
