Becomes A Reality In Japan The original Danmaku Unlimited was a rather enjoyable top-down shoot-em-up, and we loved being able to track the Mother Ship through my APQ-50 radar. While the game itself was good, it had a few minor design flaws in that you basically just did the same thing over and over again. It wasn't pretty, it didn't have challenging enemy AI patterns, it wasn't customizable and most of all, there was no multiplayer or exchange value for the numerous in-game items you collected. Many people were happy to see Danmaku Unlimited enter 3D in 2005 with a beefed up engine and all the bells and whistles, but the game itself lost some of its charm. It had a ton of unique features, the 3D engine was a first for the genre, and the social aspect just wasn't there in the form of little reward missions or human competitions. Still, the game's appeal was enough that it still sold more than one million units in less than three years. It took that long because the game got delayed several times before it even shipped. This is no news for dedicated fans, as I'm sure you already know. Just imagine what would have happened if the game came out on time, and it was another five months before the game entered stores as it finally did. This was the time several of the Japanese developers who worked on the game told Otaku Junkies that they were forming a group called Danmaku Unlimited 3 to create their own follow up. Luckily for us, the new Danmaku Unlimited 3 had everything that we wanted from the original including the Mother Ship as well as significantly more NPC characters to interact with. You can see a gameplay video of a bit of the new game, but be warned that you will be assaulted by lots of sweet commercials for the game so it isn't a screenshot kind of game. Danmaku Unlimited 3 is coming to the Wii and DS in 2006. It is being developed by Tetranopia/ Capcom and it will be released by Capcom. Everyone knows about what happens with Japanese games and their ALWAYS "Delayed Release Dates". While I salute the fact that Tetranopia is trying so hard to make this happen, it will be interesting to see if this will happen to more games in the future. There are many people here who loved Danmaku Unlimited and I hope to

Harlequin Fair is an experimental RPG and immersive sim set in the mooncast shadows of Toronto by night. You play an agent of the secretive, world-spanning HexCraft Corporation (hired, like all their other agents, by cash), a firm tasked with tracking down fugitives and handling the most dire of situations. As far as your company knows, you're just another assignment with the best pay on the east coast. If your were to hand the same description to someone else you might get a different response. Perhaps it is not as pedestrian as you suspect. Q: What is Harlequin Fair? A: An experimental indie RPG and immersive sim set in the mooncast shadows of Toronto by night. Q: What does it do? A: A: Run down three lines of dialog that describe the world and what you can do with it. Q: How is it played? A: A: 1 2 3 4 The following descriptions were in the written paperwork for the game published by IndieGala: Q: What does it do? A: A: Walk through a city built around you in a first-person style immersive sim. You're not a star in someone else's tale, but there's always someone to talk to. Q: How is it played? A: A: Play through investigations of paranormal activity, including finding out who stole a dead body, a witch, or a ghost, and interrogating key people who you meet along the way. Q: What does it do? A: A: You're the errand boy for a shadowy organization, a good man for hire who needs cash quick. You need to track down a missing person, then you need to do some more dirty work. Q: What does it do? A: A: It's not the normal fare of bland action-RPGs. It's a unique and experimental rpg-sim experience that allows you to use a mix of "easy" and "hard" methods in a physics-based world, and can turn into a normal action-RPG when you need to defend against an assault. Q: How is it played? A: A: Welcome to the game! A: If you're familiar with
