My problem is that I am getting an error when debugging on the run post load method in EF: System.Data.MetadataException: The 'Purity' property on 'System.Data.Entity.ModelConfiguration.ConfigurationObjectContext' is set to the value 'InstanceContext'. This property is only used in persistence by the CLR provider and should not be set in code. Here's my relevant code: Class Library public void CreateNewEntities() { using (var db = new Util.InstanceContext()) { db.ObjectSet().Add(new MyClass { Id = 1, Name = "This is my test object" }); } //(...) } WPF Class protected override void OnStartup(StartupEventArgs e) { InstanceContext instanceContext = (d0c515b9f4
