Features Microsoft Office integration AutoCAD supports creating many types of documents and presentations using Microsoft Office products. In addition, AutoCAD supports embedding objects, such as Microsoft Visio diagrams and SmartArt graphics. It can also synchronize with Microsoft Office desktop applications to allow users to view and edit drawings. Many of the features of AutoCAD are also available in Microsoft PowerPoint and Word. To ensure compatibility with Windows applications, AutoCAD includes the ability to open and display Word documents and PowerPoint slides. AutoCAD LT The entry-level version of AutoCAD, AutoCAD LT, is available for download as a stand-alone product or as a free add-on for AutoCAD Professional. There are many differences between AutoCAD and AutoCAD LT. For example, AutoCAD LT has a very limited user interface (less than 10 toolbars and no layers or project management), fewer interactive features, no print previews and no ability to open or save files that are over 10 GB. The main difference between the two products is that AutoCAD LT is designed for users of the full AutoCAD product and only supports AutoCAD LT files. It also supports only standard features. In the following chart, the differences are outlined in a table. The 2014 release of AutoCAD LT removed the ability to open the following file types: 3D DWG, 3D DXF, MDD (uncompressed), 3D VCE, 3D DXF, AEP, CLIP, DFX, FMEA, MV, PV and SVF files. AutoCAD LT 2010 is available for download as a stand-alone product or as a free add-on for AutoCAD Professional. AutoCAD LT 2010 has many new features, including LISP extensions, productivity enhancements and command enhancements. Other differences: Autodesk are developing and deploying AutoCAD LT to a platform based on Windows Server 2012 R2. The X, Y and Z coordinate system functions and axis drawing controls (X/Y/Z Table, scale bar, rotate tool, pan tool, grid, snap grid, data bar, origin tool) have been removed from AutoCAD LT. The layer palettes, layers panel, dialogs, and other interface elements are all brand new. Drawing panels and tools (3D, polyline, poly ca3bfb1094

Barack Obama is not a Nobel Laureate Barack Obama is not a Nobel Laureate The European Union's decision to award a Peace Prize to Barack Obama is a fine demonstration of the ambiguity that binds the Nobel Committee and the European Union. On the one hand, the Nobel Committee seems to be moving away from the tradition of awarding the prize only to Nobel Laureates and instead seems to be giving a prestigious award to any politician (or in this case, activist) who is doing something laudable. And indeed, the prize was awarded to a non-Nobel Laureate. On the other hand, by awarding Obama the Peace Prize, the European Union shows its own ambivalence: not only is there a tendency in this body to give the Nobel Peace Prize away, there is a tendency to mistake worthless activism for something more important. This is particularly true of the President of the European Commission, Jose Manuel Barroso, who gave the prize to Obama in July. Even more problematic is the fact that Barroso is not even a European Union official. This certainly reduces the credibility of the award. And yet, even if one accepts that the European Union can award a Nobel Peace Prize, the award of the prize to Obama is dubious. Here are two reasons why: first, the European Union has a long tradition of using the Peace Prize to promote European unity. The last time the European Union awarded a Nobel Peace Prize, in 2000, it was for the European Union. One of the founders of the European Union was the influential French Foreign Minister Aristide Briand. Since then, the European Union has often used the award to promote its policies, including a prominent role in the Israeli-Palestinian peace process. Even more important, the European Union has done this without ever having been awarded the Nobel Peace Prize. The European Union's decision to award the prize to Obama is a fine demonstration of the ambiguity that binds the Nobel Committee and the European Union. Go beyond the manual. Get feedback on your AutoCAD drawings with the interactive AutoCAD Mechanical Design Assistant. The Mechanical Design Assistant provides CAD operators and users with a powerful tool that guides you through the entire mechanical design process, automatically and effortlessly. Get more detailed with just a click. The new AutoCAD Mechanical Design Assistant feature gives you the capability to create very detailed mechanical drawings with full engineering analysis and multiple views. Once you've created your drawing and created the appropriate architectural views and section views, the Assistant gives you the option to turn detailed views into interactive presentation templates. These presentation templates can then be used as templates in your electrical schematic, finished product documentation, and other drawings. Save on paper with the new Print Center. You can print all your drawings and templates at the same time, instead of printing one at a time. Create a flexible, efficient workflow with full CMYK support. Save time on the surface. With the new Surface Design tools, you'll see the potential for great efficiency gains by working on a single layer. Start and edit drawings faster. Because you're working on a single layer, starting and editing drawing components is more efficient. Plus, you have the freedom to toggle between multiple layers, with the ability to toggle your work between single and multi-layer editing modes without switching layers. Speed up your response time. With performance improvements and integrated multi-monitor support, you can complete your work faster. Work where you want. With improved the ability to use your favorite tools and functions without having to leave your drawing. System Requirements For AutoCAD:

- Mac OS X 10.6 Snow Leopard or later - 1.5 GHz processor (recommended 1.8 GHz) - 512 MB RAM (1 GB or more recommended) - 3 GB available hard drive space You need an Apple Computer that is running Mac OS X Snow Leopard. I also recommend you have at least 512 MB of RAM in your computer (I recommend at least 1 GB). This is the most expensive program I have ever purchased, so you do need to invest in a decent graphics card and a good internet connection
