K can't sleep free download for pc Windows 7 The Best K can't sleep Free Download Full Version of K can't sleep for Windows PC devices.Q: Ansible loop through variables in Playbook vars/main.yml My playbook uses environment variables to determine configuration. I would like to loop through the variables in the Playbook vars file. The below gives error, any ideas? - name: generate variables file hosts: localhost gather_facts: no vars: address1: - testing - testing2 - testing3 - testing4 - testing5 - testing6 tasks: - name: load vars include_vars: vars: "{{ lookup('env', 'address1') }}" with_items: - {{ address1 }} Expectation/goal I would like to print the variables in the loop, something like: testing testing2 testing3 testing4 testing5 testing6 A: To loop through a list in a dictionary you should use the loop module and not the with_items loop. You should be able to write: - name: generate variables file hosts: localhost gather_facts: no tasks: - name: load vars include_vars: vars: "{{ lookup('env', 'address1') }}" loop: "{{ address1|default([])|list }}" These are ten awesome tips for making the most of the great outdoors and adventures. I hope you enjoy them. 1. Don't Always Drive, Take the Train I'm always amazed by how many people still drive to their destinations when so many other
