----- This is a zip file that contains the main files for the application and a few add-ins to make it easier to get the program up and running quickly. If you have problems extracting, please right click on the file and select "Extract All", and your computer will do the rest. Once the file is extracted, the latest file is in the folder titled "HDUpgrader\X.Y\bin" where X.Y is the version number of the application. You will then want to open the file "HDUpgrader.exe" to start the application. By default, the application will not run automatically when starting up. This is to prevent it from replacing your Operating System with a Free upgrade. The free version, up to version 1.9.0, allowed copying from 2.00 GB and up, but in version 1.10.0, this is fixed and can now be used to copy from 2.00 GB and up. Because of the new version, the application has been re-built and the source code has been changed so that it should work correctly on newer Operating Systems. While there are people that have reported success copying from smaller hard disks in the past, we still do not recommend it. Please leave a review if you can. That is the only way I can make sure that I am developing the best possible software I can. Hard Drive Upgrader does not replace the Operating System. That would be the equivalent of installing a new Operating System on your Computer. Hard Drive Upgrader is a free utility that turns your hard drive into a new drive. It will automatically re-size your FAT/NTFS partitions. No rebooting or changing partitions. This is the best solution to replacing your hard drive if you are running a system that will not run on a new drive. It is not possible to copy from small drives to large ones because the operating system will not work properly. It will not recognize the new partition sizes and the system files will be re-written to fit the larger size drives. It is possible to copy from small drives to larger drives if you are using a newer version of Windows, but it will not work from 2.00 GB and up. If you are having problems opening the file, please right click on the file and select "Extract All" and it will do the rest

The Operating System and Applications of the source drive are automatically detected and they are automatically saved to the destination drive. As a result, the new installation of Windows, Mac OS, Linux, etc. is prepared with all drivers, libraries, and applications already installed. Hard Drive Upgrader runs automatically in the background and takes care of partition size re-sizing, file copying, and the application of system files. You can configure the speed of the copying process by changing the number of idle partitions./***** * * * *
