What's New In?

You can create your own document templates and easily add the text from scanned documents to your documents. The preview function makes it possible to check what the program is doing in order to make sure you select the text you want to keep from the document. Application Features: * The application is easy to use and creates user-friendly menus to get you started. * The software supports standard image formats (such as JPG, BMP, PNG or GIF) and the document can be opened in a normal PC environment. * The application allows the preview of the image after the conversion process and it is possible to edit the text before saving the converted document in TXT format. * It can be used to convert a large number of scanned documents in a very short period of time. * The application can work with the majority of the PDF and DOC (Microsoft Word) versions. * The application can import documents, both *.doc and *.pdf files. * The software will save the text files in the same folder as the original document. * The user can preview the preview image. * The software can use the Windows clipboard as a source of the characters. * The software will analyze the document, including OCR and text recognition, and the user can copy the text from the original document. * The application can also import images from the clipboard. OcrTool is a fully functional and efficient character recognition tool, specially designed for conversions. OcrTool is able to recognize plain text from scanned images, PDF documents, images and also from the clipboard. OcrTool is a Windows application but also available for Mac OS X as a universal binary. OcrTool - Scanned document/image - Windows Features: * OcrTool allows you to open scanned documents and extract the text of the scanned document directly from the application. * OcrTool can open and extract the text from PDF documents. * OcrTool can also import OCR text from the clipboard. * OcrTool can be used to extract characters from images. * OcrTool allows the users to choose a specific color as a background. * OcrTool allows you to save the recognized text into text files. * OcrTool allows you to edit the recognized text. * OcrTool allows you to choose a specific font as a background. * OcrTool allows you to choose a specific font as a foreground. What's new in this version: The application is updated to support Unicode and Unicode 4.0. With the new releases of Java, many software apps are changing the way their data is stored on your hard drive. To enable you to use these apps, you need to install and maintain a special driver. Windows 7 is ready to use with the latest Java version. Windows 7 has built in support for Java, which means no

System Requirements For MeOCR:

Supported resolutions for the game is 800 x 480 and 640 x 480. At this time, minimum specs are recommended. Description: The new F.E.A.R. Shooter 1.0 is a fast paced FPS based game from the FPS genre like Call of Duty, Half Life 2, and Doom. This game is not based on Half Life. The background, story, characters and levels are all original and own designed. It is the first game of its kind to include Source Engine. Since it's based on Source Engine, this game is multi-platform compatible
