KEYmacro enables you to define and execute macro keyboard shortcuts from a macro recording file. A macro recording file is a text file, which contains a list of keystrokes, which can be executed later. Such files are typically created by typing text in a recording program, as described in more detail below. To define a macro, right-click on the KEYMACRO icon in the notification area, and select New Macro... or click on the Keyboard icon, and select New Macro... On the Mac, you would press Command+Alt+T to open the Keyboard menu. In Windows, you would press Control+Alt+T From there, you would click on the Record Macro button to start recording the sequence of keyboard keys you wish to trigger. The sequence of pressed keys will be recorded for later. Right-click on the record button to stop recording the sequence. By double-clicking on the record button, you can also play the macro sequence back. Macro files can also be edited using a text editor. KEYMACRO supports the following features: • Macro names and definitions, with the ability to reuse defined macros • Macro recording and playback • Can record keyboard shortcuts from one or more programs • Include special characters • Paste special characters to the clipboard • Reroute keyboard shortcuts to specific apps • Automatically clear the recording history • Full clipboard support • Supports most keyboard layouts: English US, French Canadian, UK, German and Polish • Supports most programs: Internet Explorer, Firefox, Chrome, Thunderbird, Opera, and many more • Exceptions can be defined in the Exceptions text file • Many more features are available in the documentation! KeyMACRO icon Usage: If you wish to have a notification area icon for KEYMACRO, simply drag the icon from the KeyMACRO directory onto the notification area on your Desktop. You will get the desired icon, placed in a small white folder. If you are not satisfied with the placement of the icon, you can move it to your notification area. First, select the icon by double-clicking on it. Then, drag the icon to the notification area. You can choose to have the icon stay visible on your notification area, or hide it. To hide the icon, drag it off the notification area. To re-display the icon, drag it on your Desktop. KEYMACRO icon works with the following themes: 2edc1e01e8
