You can also easily send someone a link to a section of your document. And if you want to share a specific bit of content, you can create a new section. Finally, you can see who has access to the document and where they can make changes. This tool is used to add and remove color from an image. In Photoshop, you can add color to or take the color away from a specific area of an image. You can also create a range of tones between two colors — for example, from a light tone to a shadow tone. You can use this tool to enhance a particular image area without affecting the rest of it. The way you make color changes is by moving the cursor over the area you want to affect, and then by clicking and dragging to define its new color. You can also use the Magic Wand tool to change the color of an area, by clicking on one of the color rings in the tool's Options bar. e3d0a04c9c
