Q: Yii2 - How can I get product category and product name? I'm trying to create table similar as in the link below. I have this code:

```
$category = Category::find(); $title = "".$category->name.'"; $attribute = (new Category()->createAttribute('name', $category->name); $criteria->addAttributeToSelect('name'); $criteria->compare('name', '=', $title, true); $criteria->compare('name', 'BETWEEN', $title, true); $criteria->addInCondition('group_id', 9998); $data = Category::find() ->select('category_id') ->from('skus') ->andWhere(['like', 'name', $title, true]) ->all(); foreach ($data as $value) {
```
